COURSEWORK

UNDERGRADUATE

Design and Analysis of Algorithms
Data Structures
Machine Learning(Coursera)
Artificial Intelligence
Object Oriented Programming
Computer Networks
Google Cloud

TECHNICAL SKILLS

Front-end development

- HTML,CSS,JavaScript

Backend Development

- Django

Creating big and small projects

- Computer Vision (Python,Flask)
- Django+React
- Machine learning

Solving Data structure and algorithms questions

- Python and C++

Operating system

- Windows
- Mac OS
- Linux/Unix

Robust full-stack system design implementation.

EDUCATION

Pursuing B.tech
RGPV / 2017-2021

- CGPA - 7.32

12 Maths
MP Board / 2016-2017

- Percentage -74.8%

EXPERIENCE

EC-Solution | Co Instructor

oct 2019 - March 2020 | Indore,India

- Worked as Python Developer and CO Python Instructor. i helped students to Solve problems and Clear Problems doubts.i was responsible or setting up statements, creating problems and providing detailed tutorial for problems.

PROJECTS

The Invisibility Cloak(Python + OpenCV)

- Developed an Application called The Invisibility Cloak using simple Computer vision techniques in OpenCV, In this Application we remove the foreground.

Social-Finder(Python + Django+Bootstrap4)

- Developed an Application called Social_Finder Using Django And Twitter Bootstrap.In this application we Check username on Instagram,Facebook,LinkedIn,GitHub etc.

Para Coders Site (HTML+CSS+Js)

- Developed an e-learning site in which we provide digital data to the students like programming courses, notes, books and free resources also give gateway of other top useful website who helps them for increasing there technical knowledge

Hotel Search Site (Django + HTML Templates)

- Developed an Hotel Search Site with Django and HTML Templates. In this Application we search rent and sale property on keywords and location,

PROGRAMMING ACHIEVEMENTS

GOOGLE CODE JAM 2020

- Round 1 Rank 1477/139567

HackerRank

- Python 5 star
- Problem Solving 6 star

CodeChef

- 3 star rating on codechef
